Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: The Applicant's Amendments and Accompanying Remarks, filed January 26, 2010, have been entered and have been carefully considered. Claim 43, 46 and 49 are amended and claims 43 - 50 are pending.
2. In view of Applicant's amendment to claims 43, 46 and 49 requiring that the bond between the first fiber mat and the gypsum core has a tensile strength of the bond of at least 16 pounds per square inch, the Examiner withdraws the rejection of claims 43 – 50 as obvious over Hauber et al. (US 6,524,679) in view of Bush et al. (US 2003/0134079 A1) and further in view of Schlachter (US 6,077,593). The closest prior art, Bush et al., fail to teach or suggest a tensile strength of the bond is at least 16 pounds per square inch. Bush et al. discloses coating a glass mat from approximately 25% up to 75% of the mat thickness affords higher tensile strengths (page 3, [0034]). However, Bush et al. fail to specifically disclose that a coated glass mat within the thickness range would have a tensile strength of the bond of at least 16 pounds per square inch. As the tensile strength would be affected by the composition of the gypsum and parameters of the glass mat, binder and mineral pigment and Bush et al. do not teach or suggest a highly similar gypsum board to the gypsum board of the invention, the prior art does not provide guidance for creating a gypsum board with the claimed penetration level and a tensile strength of at least 16 pounds per square inch.

3. An updated art search did not produce any new substantial art for which to base a rejection and presently no motivation exists to combine references to render the claimed invention obvious.
4. As such, claims 43 – 50 are found allowable over the prior art of record.
